MUHAMAD OSKHAR MUBAROK

SOFTWARE ENGINEER | BACKEND ENGINEER

Cengkareng, West Jakarta, Indonesia | +62 81386380481 | muhamadoskharm@gmail.com | linkedin.com/in/oskhar
Portofolio: https://oskhar.github.io

PROFESSIONAL SUMMARY

Software Engineer and Backend Engineer with 3+ years of experience building and maintaining enterprise, banking, transportation, retail, government, and AI-integrated systems. Experienced in Golang, Java, NestJS, Laravel, REST APIs, microservices, event-driven architecture, Kafka, PostgreSQL, MySQL, Docker, Linux, and CI/CD. Currently contributing to enterprise banking software at PT Bank OCBC NISP Tbk through Abishar. Previously served as the primary backend engineer and technical PIC for GMF AeroAsia's CAPEX, OPEX, G-SMART, and OCX 2.0 platforms, with hands-on experience in system integration, database design, production troubleshooting, and delivery coordination across architects, engineers, and business stakeholders.

TECHNICAL SKILLS

Programming Languages: Golang, Java, TypeScript, JavaScript, PHP, Python
Backend & Architecture: Spring Boot, NestJS, Node.js, Express.js, Laravel, FastAPI, Fiber, REST APIs, Microservices, Event-Driven Architecture
Data & Messaging: PostgreSQL, MySQL, Redis, Apache Kafka
DevOps & Infrastructure: Docker, Jenkins, GitHub Actions, Linux, Apache Web Server, KVM Virtualization, CI/CD
Tools & Practices: Git, GitHub, Jira, Agile, System Design, Database Design, Performance Optimization, Production Support
Frontend: React, Vue.js, Vuetify

PROFESSIONAL EXPERIENCE

PT BANK OCBC NISP TBK
Jun 2026 - Present

Software Engineer

- Engineer enterprise banking solutions for B2B and corporate cross-border transactions spanning multiple countries, banking entities, and regional payment infrastructures.
- Design and maintain transaction flows that accommodate country-specific regulatory requirements, payment identifiers, routing rules, account structures, and regional standards such as IBAN across Europe and the Middle East.
- Handle complex cross-border scenarios where transaction behavior varies by destination, banking entity, branch structure, local infrastructure, and whether an institution operates as a local bank or an overseas branch of an Indonesian bank.
- Translate complex business, regulatory, and banking requirements into reliable backend implementations while maintaining transaction integrity, validation accuracy, and operational consistency.
- Collaborate with architects, engineers, and business stakeholders on requirements analysis, implementation, testing, production troubleshooting, and controlled delivery of transaction-critical systems.

PT GARUDA MAINTENANCE FACILITY AEROASIA TBK
Jan 2026 - May 2026

Backend Engineer | ***Full-time assignment through PT Nuxatech***

- Served as the primary Backend Engineer and technical PIC for CAPEX, OPEX, G-SMART, and OCX 2.0, supporting enterprise finance and operational workflows at GMF.
- Worked directly with GMF Solution Architects, Lead Engineers, and business stakeholders to analyze requirements, define backend solutions, and coordinate delivery.
- Designed and maintained NestJS services, PostgreSQL data models, REST APIs, system integrations, approval flows, and budget validation logic.
- Implemented and maintained microservice and event-driven communication using Apache Kafka for reliable integration between enterprise services.
- Managed Docker environments, Jenkins pipelines, server provisioning, and CI/CD activities across development and production environments.
- Resolved production issues through root-cause analysis, database troubleshooting, and safe deployment and migration practices that prioritized service continuity and data integrity.

Key Systems: CAPEX and OPEX for expenditure planning, budgeting, approvals, realization, and monitoring; G-SMART for COGS and sales support; OCX 2.0 for platform modernization and feature enhancement.

GOOGLE DEVELOPER GROUP ON CAMPUS (UIN Jakarta)
Okt 2024 - May 2025

Teacher | **Weekly Class Developer**

- Taught, mentored, and guided students and university learners in understanding fundamental to advanced concepts of software development, covering both Frontend and Backend technologies.
- Designed and developed technical learning curricula aligned with industry requirements to accelerate students' learning progress and enhance their practical skills.
- Evaluated student assignments and coding projects while sharing insights into best practices in algorithmic logic and software engineering.

PT SAVANAH ALVAN MAKSIMA
Sep 2024 - Oct 2025

Software Developer

- Built scalable Golang and NestJS backend services and REST APIs for AI-powered surveillance and enterprise platforms.
- Developed real-time data-processing and AI-integration services, optimized database schemas and queries, and implemented Kafka-based asynchronous communication.
- Managed Docker and Linux deployments, performance optimization, monitoring, debugging, and production incident resolution while contributing to solution design.

Key Systems: Video Management System with face recognition, vehicle analytics, people counting, and behavioral monitoring; TransJakarta Driver Monitoring System for behavior, seatbelt, fatigue, and compliance detection; Enterprise Resource Planning platform.

CV GHINA MULTIPRIMA
Apr 2025 - Jul 2025

Backend Engineer Intern | ***Concurrent internship***

- Developed backend services and APIs for centralized infrastructure and application monitoring using Python, FastAPI, Express.js, and Java.
- Supported Linux server administration, Docker deployment, automation, metric collection, observability, testing, debugging, and technical documentation.

Project: Centralized Infrastructure & Application Monitoring System for collecting, processing, and visualizing operational metrics from multiple deployed systems.

TOKO MUVIE UMKM
Feb 2024 - Aug 2024

Full Stack Developer | ***Project-based***

- Delivered a multi-branch Point of Sale and Inventory Management System using Golang REST APIs, Vue.js, Vuetify, PostgreSQL, Docker, and Linux.
- Implemented sales transactions, inventory tracking, stock transfers, financial reporting, and branch management while collaborating directly with business stakeholders.

KELURAHAN PRIUK
Sep 2023 - Apr 2024

Full Stack Developer | ***Project-based***

- Built a public health platform for stunting prevention with WHO Z-Score assessment, nutritional recommendations, educational content, community engagement, and UP3K product management.
- Managed deployment, infrastructure, testing, debugging, and ongoing system maintenance for the community-facing application.

EDUCATION

UIN Jakarta
Sep 2022 - May 2026

Bachelor of Informatics Engineering

Thesis: Multi-Dimensional Evaluation of Modern Backend Architecture Patterns in Data-Intensive Applications. Compared a monolith baseline with a hybrid microservices, CQRS, and Event Sourcing architecture across performance, architectural, and developer-experience dimensions.

CERTIFICATIONS & ACHIEVEMENTS

Web Development Weekly Class - Frontend & Backend Specialization
Google Developer Student Club | Dec 2023 - Feb 2024

1st Place - Competitive Programming Competition
Study Program Level | Jan 2023 | Recognized for problem solving, algorithm design, and efficient implementation under competitive constraints.

ORGANIZATIONAL EXPERIENCE

Technical Core Team - Web Development
Google Developer Group on Campus (GDGoC), UIN Jakarta | Oct 2023 - Apr 2025

CORE COMPETENCIES

Backend Development, Software Architecture, Microservices, REST API Development, Event-Driven Architecture, Distributed Systems, Database Design, System Integration, Enterprise Application Development, Performance Optimization, CI/CD, Dockerization, Linux Administration, Technical Leadership, Stakeholder Communication, Production Troubleshooting, and Production Support.
